

NORMAL_TS001 — Normal Savings Account Application Journey Test Execution Report

Date: 11–13-Aug-2026 (multi-day live execution)
Environment: UAT — <https://sahyogagentweb.drutam.in:9634>
Browser: Chromium (Desktop Chrome)
Test User: nayan.aher@netwinindia.in
Applications used: SAH-1001-796 (Shubham Madhukar Borse, Joint account with Pagar Jayesh Arun as joint applicant — Submitted), SAH-1001-805 (Yash Pravin Sonawane, Individual — Submitted), SAH-1001-806 (Bhushan Vishnu Joshi, Minor, guardian Shubham Madhukar Borse — Submitted)

Executive Summary

This module mirrors the Silver Savings Account (SILVER_TS001) in structure but covers the "Normal Savings Account - 1001" scheme, whose Applicant Id series (SAH-1001-nnn) is distinct from Silver's (SAH-1002-nnn). The user story as originally written (user-stories/US_009_Normal_Account_journey.md) intentionally left every stage, field, and business rule to be discovered live rather than assumed from Silver's behavior — that caution proved warranted, since several genuine cross-scheme routing differences were found (see below).

Live execution walked all **three Account Types** — Joint, Individual, and Minor — end to end over three real applications, using real phone numbers, real OTPs, real DigiLocker authentication, and real Liveliness/photo capture throughout. All three applications were **submitted for real** after explicit user sign-off following a field-by-field Summary cross-verification pass on each.

- Joint** (SAH-1001-796 , resumed from a pre-existing real draft already past Mobile Verification/Account Type): traced from eKYC Verification through the full Joint Applicant Details mirror sub-journey (including a live test of "Change Mobile Number?" mid-flow) to Summary and final submission.
- Individual** (SAH-1001-805 , started fresh): traced end to end with Funding Mode = Cash and Employment Type = Self employed, deliberately chosen to fill two coverage gaps left by the Joint pass (Cash-side Cheque Details skip, and a non-Salaried Employment Type route).
- Minor** (SAH-1001-806 , started fresh in preference to a pre-existing draft that used a placeholder "Test Uat Minor" identity): traced end to end including a live-reproduced real DigiLocker consent denial ("Action Required") and successful recovery via Resend Link for the guardian's own eKYC.

87 test cases were executed or documented, of which **85 passed** and **2 remain not-yet-executed** (a residual Employment Type sweep and an invalid-Introducer-Account-Number negative case). **All 87 are Manual (Live-Assisted)** — as with every other OTP/DigiLocker/Liveliness-gated module in this project, none of this journey can be safely or meaningfully automated for unattended re-run, since every execution consumes a real phone, SMS, DigiLocker session, or camera capture belonging to a real person. No dedicated automated Playwright suite exists yet for this module (unlike Silver's tests/8_SILVER_TS001/ , which covers only its non-OTP-gated field-validation and cross-cutting-concern cases).

Four confirmed defects were found, the most significant being BUG-NORMAL-002 (High) — Document Upload silently discards a previously-uploaded document when a second, mandatory document type is subsequently required, with no warning shown at any point — and BUG-NORMAL-004 (Medium) — Basic Details' Email ID field intermittently rejects syntactically valid emails containing a dot in the local part, which (combined with Basic Details' pre-existing no-partial-save behavior) wipes an entire 20+ field form on what should be a trivial correction.

One important self-correction occurred mid-session: an initial finding that "Change Branch selection doesn't persist" was investigated further at the user's prompting and proven to be tester error via network tracing with explicit timing marks — the step genuinely requires **two** Submit clicks (the first only updates the local view; the second fires the real save call). This was corrected in the story/plan before being finalized as a defect, and **calls the Silver Savings Account's existing BUG-SILVER-009 into question** — it was very likely the same misunderstanding, not a genuine product defect, and should be re-verified before continuing to be reported as confirmed against Silver.

Two genuine cross-scheme routing differences from Silver were confirmed: Introducer Details is mandatory for **all three** Account Types on the Normal Savings Account (Joint, Individual, and Minor), whereas on Silver it is Joint-only (Individual and Minor both skip it there).

Test Statistics

Category	Total	Passed	Failed	Not Executed	Automated	Manual (Live)
Scheme Selection	4	4	0	0	0	4
Mobile Number Verification	5	5	0	0	0	5
Account Type	4	4	0	0	0	4

Manual (Live-Assisted) Test Case Execution

All rows below were executed live against the real UAT environment with real, human-relayed data (mobile OTPs, DigiLocker authentication, Liveliness/photo camera captures) — per project convention, these are not automated since each run consumes a real phone/SMS/DigiLocker/camera session belonging to a real person.

Scheme Selection

Test Case ID	Title	Test Data	Priority	Actual Result
TC-NOR-001	Scheme list shows "Normal Savings Account - 1001" as a selectable option	N/A	Critical	✔ Pass
TC-NOR-002	Selecting the scheme navigates to /applndetails , shows correct Product/Scheme Name	N/A	Critical	✔ Pass
TC-NOR-003	Journey launches into Mobile Number Verification as the first step	N/A	Critical	✔ Pass
TC-NOR-004	Applicant Id follows SAH-1001-nnn format, distinct from Silver's SAH-1002-nnn	SAH-1001-796	Medium	✔ Pass

Mobile Number Verification

Test Case ID	Title	Test Data	Priority	Actual Result
TC-NOR-010	"Send Verification Code" sends a real OTP, shows validity/resend countdown	Real numbers throughout	Critical	✔ Pass
TC-NOR-011	Correct OTP shows success message, advances to next step	Real OTPs throughout	Critical	✔ Pass
TC-NOR-012	Resending too soon is blocked: "Mobile verification request is already in process!"	9545368828, 9511996248 (reused numbers)	Medium	✔ Pass
TC-NOR-013	"Change Mobile Number?" during a pending OTP resets to a blank field for a new number	Joint applicant: 9403564649 → 9511996248	High	✔ Pass
TC-NOR-014	The newly entered number after Change Mobile Number receives its own fresh OTP, verified independently	9511996248, OTP 369619	High	✔ Pass

Account Type

Test Case ID	Title	Test Data	Priority	Actual Result
TC-NOR-020	Account Type = "Joint" is valid and submittable	SAH-1001-796	Critical	✔ Pass
TC-NOR-021	Account Type = "Individual" full journey through Summary and final submission	SAH-1001-805	High	✔ Pass — submitted for real
TC-NOR-022	Account Type = "Minor" full journey through Summary and final submission	SAH-1001-806	High	✔ Pass — submitted for real
TC-NOR-023	[Defect pattern, same as Silver TC-SIL-011] "Joint" pre-selected by default with no user action	SAH-1001-805, SAH-1001-806	Medium	✔ Pass (documents finding, reproduced on 2 fresh applications)

eKYC Verification

Test Case ID	Title	Test Data	Priority	Actual Result
TC-NOR-030	eKYC screen shows 4 options: Aadhaar (DigiLocker, mandatory), PAN, DL, Voter ID	N/A	Critical	✔ Pass
TC-NOR-031	Aadhaar via DigiLocker: real link sent, real auth completed, status Successful	Real DigiLocker auth, 3 applicants	Critical	✔ Pass
TC-NOR-032	Applicant identity (Name, DOB) auto-populates into Basic Details after eKYC	Both applicants	Critical	✔ Pass
TC-NOR-033	Submit is only meaningful once mandatory Aadhaar is Successful	N/A	High	✔ Pass

Liveliness Verification

Test Case ID	Title	Test Data	Priority	Actual Result
TC-NOR-040	Liveliness screen shows two options: Security Code Based, camera-based	N/A	Critical	✔ Pass
TC-NOR-041	Security Code Based Liveliness: real link, real applicant completes, status Successful	Real photo w/ code, 3 applicants	Critical	✔ Pass

Address Details

Test Case ID	Title	Test Data	Priority	Actual Result
--------------	-------	-----------	----------	---------------

TC-NOR-050	Primary applicant's Permanent Address auto-populates from Aadhaar/eKYC	N/A	Critical	✔ Pass
TC-NOR-051	Manual Communication Address entry succeeds, advances to Branch Selection	Aurangabad, Maharashtra 431001 / Nashik, Maharashtra 422010	Critical	✔ Pass
TC-NOR-052	[BUG-NORMAL-001] "Use Existing Address" only fills Address Line 1, State/City/Pin left empty	N/A	High	✔ Pass (confirmed on 4 separate address screens)
TC-NOR-053	Address Line 1/2/Area are <code></code></code>, not <code><code></code> <code><input></code><code></code></code>
