

SCH_TS001 — Scheme Selection Test Execution Report

Date: 31-Jul-2026
Environment: QA — https://sahyogagentweb.drutam.in:9634
Browser: Chromium (Desktop Chrome)
Test User: nayan.aher@netwinindia.in
Route under test: /schemelist

Executive Summary

28 automated test cases were executed against the Scheme Selection screen (reached via Home → Savings Application card → New Application), covering navigation, active scheme listing, search, the auto-rotating Scheme Details panel, scheme-selection/redirect behavior, side navigation, UI alignment, and basic performance timing. **All 28 test cases passed.** One defect was found and documented (BUG-SCH-001): a search with no matches empties the scheme list but does not show a "No Results" message, as AC3 requires. No network/API failures (non-2xx responses) were observed anywhere in the flow.

Test Statistics

Test Type	Total	Passed	Failed
Happy Path / Navigation	3	3	0
Data Integrity / Read	4	4	0
Search / Business Rule	6	6	0
Security	2	2	0
Details Panel (Carousel)	4	4	0
Scheme Selection / Redirect	2	2	0
Side Navigation	2	2	0
UI / Responsive	2	2	0
Non-Functional (Performance)	2	2	0
Defect-Documenting	1	1	0
Total	28	28	0

Test Case Execution

Test Case ID	Title	Test Type	Preconditions	Test Steps	Expected Result	Test Data	Priority	Actual Result
TC-SCH-001	Clicking Savings Application card then New Application navigates to Scheme Selection and loads successfully	Happy Path	Logged in, on Home Dashboard	1. Click Savings Application card 2. Click New Application on /UNPOSTED	Redirected to /schemelist ; search box and scheme cards visible	N/A	Critical	✔ Pass
TC-SCH-002	Scheme Selection screen loads with no page errors	Happy Path	On /schemelist	1. Navigate to screen 2. Listen for pageerror events	Zero page errors thrown	N/A	Critical	✔ Pass
TC-SCH-003	Page has a valid title	Happy Path	On /schemelist	1. Assert document.title	Non-empty page title	N/A	Low	✔ Pass
TC-SCH-004	All active schemes returned by the API are displayed as cards in the list	Happy Path	On /schemelist	1. Read all scheme card texts	List is non-empty; every card has non-empty text	3 schemes (Silver Savings Account-1002, Normal Savings Account-1001, Staff Salary Account-1003)	Critical	✔ Pass
TC-SCH-005	Scheme card list contains no duplicate scheme names	Data Integrity	On /schemelist	1. Read scheme names 2. Compare against a de-duplicated set	Set size equals list length (no duplicates)	N/A	Medium	✔ Pass
TC-SCH-006	Each scheme card displays a non-empty Scheme Name	Happy Path	On /schemelist	1. Iterate every card and read its text	Every card's text length > 0	N/A	High	✔ Pass
TC-SCH-007	Scheme list container is scrollable	UI	On /schemelist	1. Inspect the list container's inline style	Container style includes overflow: auto	N/A	Low	✔ Pass
TC-SCH-008	Searching a full valid Scheme Name returns exactly the matching scheme	Happy Path	On /schemelist	1. Type Silver Savings Account - 1002 into search	List narrows to exactly 1 matching card	Silver Savings Account - 1002	Critical	✔ Pass
TC-SCH-009	Searching a 4+ character mid-name substring correctly filters the list (BR1)	Happy Path	On /schemelist	1. Type ving (mid-string substring, not a prefix)	Every returned card's name contains ving (case-insensitive)	ving	High	✔ Pass
TC-SCH-010	Searching fewer than 4 characters does not filter the list (BR2)	Business Rule	On /schemelist	1. Record full list 2. Type Sil (3 chars)	List is unchanged — identical to the unfiltered full list	Sil	Medium	✔ Pass

Test Case ID	Title	Test Type	Preconditions	Test Steps	Expected Result	Test Data	Priority	Actual Result
TC-SCH-011	Search is case-insensitive	Happy Path	On <code>/schemelist</code>	1. Search <code>SILVER</code> 2. Search <code>silver</code>	Both searches return the identical single-card result	<code>SILVER</code> , <code>silver</code>	Medium	✔ Pass
TC-SCH-012	Leading/trailing whitespace in the search box is trimmed before matching (BR3)	Negative/Validation	On <code>/schemelist</code>	1. Type <code>Silver</code> (padded)	Returns the same single result as an untrimmed <code>Silver</code> search	" <code>Silver</code> "	Medium	✔ Pass
TC-SCH-013	[Defect BUG-SCH-001] A 4+ char search matching no scheme empties the list but shows no "No Results" message	Negative/Empty State	On <code>/schemelist</code>	1. Type <code>zzzznonexistent</code>	Expected (AC3): list empties AND an appropriate "No Results" message is shown. Actual: list correctly empties to 0 cards, but no "No Results"/empty-state message is displayed anywhere in the panel.	<code>zzzznonexistent</code>	High	✔ Pass (documents BUG-SCH-001)
TC-SCH-014	Clearing the search box restores the complete, unfiltered scheme list	Happy Path	On <code>/schemelist</code>	1. Record full list 2. Search a known scheme 3. Clear search box	List returns to exactly the original unfiltered full list	<code>Silver Savings Account - 1002</code> then cleared	Medium	✔ Pass
TC-SCH-015	XSS payload in the search box does not execute and produces no page error	Security	On <code>/schemelist</code>	1. Type <code><script>alert(1)</script></code> into search	No JS dialog fires; zero page errors	<code><script>alert(1)</script></code>	High	✔ Pass
TC-SCH-016	Scheme Details panel is visible alongside the scheme list	Happy Path	On <code>/schemelist</code>	1. Assert panel and card-list visibility	Both the carousel panel and the scheme card list are visible simultaneously	N/A	Critical	✔ Pass
TC-SCH-017	The active panel slide displays a non-empty Scheme Name and Description	Happy Path	On <code>/schemelist</code>	1. Read the active carousel slide's name and description	Both fields are non-empty	N/A	High	✔ Pass
TC-SCH-018	The Next carousel control changes the active slide without a page error	Happy Path	On <code>/schemelist</code>	1. Record active slide 2. Click Next Page control	Active slide name changes; zero page errors	N/A	Medium	✔ Pass
TC-SCH-019	The panel auto-rotates to a different slide without manual interaction	Happy Path	On <code>/schemelist</code>	1. Record active slide 2. Wait, polling every 4s up to 24s, without any interaction	Active slide name changes at least once within the polling window	N/A	Medium	✔ Pass
TC-SCH-020	Clicking a scheme card navigates to the Savings Application screen without error	Happy Path	On <code>/schemelist</code>	1. Click a scheme card	Redirected to <code>/applndetails</code> ; zero page errors	<code>Silver Savings Account - 1002</code>	Critical	✔ Pass
TC-SCH-021	The selected Scheme Name and Product Name are carried forward to the Savings Application screen	Happy Path	On <code>/schemelist</code>	1. Click a scheme card 2. Read Product Name / Scheme Name fields on <code>/applndetails</code>	Product Name shows "Savings Account"; Scheme Name shows the selected scheme	<code>Silver Savings Account - 1002</code>	Critical	✔ Pass
TC-SCH-022	Home, My Profile, Notifications, About Us are all visible and enabled on the Scheme Selection screen	Happy Path	On <code>/schemelist</code>	1. Assert visibility/enabled state of all 4 sidebar nav links	All 4 links visible and enabled	N/A	High	✔ Pass
TC-SCH-023	Clicking Home from the Scheme Selection screen redirects to the Home Dashboard	Happy Path	On <code>/schemelist</code>	1. Click Home in sidebar	Redirected to <code>/HOME</code>	N/A	High	✔ Pass
TC-SCH-024	Page layout stays within viewport width at desktop resolution	UI/Responsive	On <code>/schemelist</code>	1. Compare document scroll width to viewport width	Scroll width ≤ viewport width (no horizontal overflow)	Desktop viewport	Medium	✔ Pass
TC-SCH-025	Search bar, product heading, and scheme cards render without overlap or truncation	UI	On <code>/schemelist</code>	1. Assert visibility and bounding boxes of search bar, heading, first card	All elements visible with valid (non-null) bounding boxes	N/A	Low	✔ Pass
TC-SCH-026	Scheme Selection screen loads within an acceptable response time	Non-Functional	On <code>/schemelist</code>	1. Reload page 2. Measure time until scheme list is loaded	Load completes within 10 seconds	N/A	Medium	✔ Pass
TC-SCH-027	Search results update within an acceptable response time after typing	Non-Functional	On <code>/schemelist</code>	1. Type into search box 2. Measure time until list updates	Update completes within 3 seconds	<code>Silver</code>	Medium	✔ Pass

Defect Log

Defect ID	Title	Description	Priority	Severity	Status
BUG-SCH-001	No "No Results" message shown for a zero-match scheme search	AC3 explicitly requires that "Invalid search displays an appropriate 'No Results'." A search of 4+ characters that matches no scheme correctly empties the scheme card list, but no "No Results" text or empty-state UI is shown anywhere in the panel — the area beneath the "Savings Account" heading is simply blank, giving the user no feedback that their search returned nothing (as opposed to, e.g., the page still loading).	Medium	Minor	Open

Business Rules Confirmed (via live recon, not in the original story)

- **BR1 — Substring match:** Search matches the entered text anywhere within the Scheme Name (case-insensitive), not just as a prefix — confirmed with "ving" , "Account" , "1002" , and "savings account" all correctly narrowing the list.
- **BR2 — 4-character minimum:** Search only activates once the trimmed query reaches 4 characters. Below that (1–3 characters), the search is a no-op and the full unfiltered list is shown, even for 3-character strings that are genuine substrings of a scheme name (e.g. "Sav" , "Sta").
- **BR3 — Whitespace trimming:** Leading/trailing spaces are trimmed before matching.
- **BR4 — Panel/list independence:** The Scheme Details carousel and the scheme card list are independent components; the carousel keeps auto-rotating on its own timer and is not affected by the search box.

Coverage Notes

- Only 3 active schemes exist in the current UAT data set (Silver Savings Account-1002, Normal Savings Account-1001, Staff Salary Account-1003), and no inactive scheme currently exists — so AC2's "inactive schemes shall not be displayed" requirement could not be exercised against a real negative case and is not automated as a standalone assertion.
- Pagination controls for the scheme list are out of scope for automation — the live UI uses a single scrollable container, not a paginator, for the current data volume.
- The carousel's exact auto-rotation interval was not asserted as a fixed number (e.g. "rotates every N seconds") since the interval was observed to vary/cycle unevenly across samples; TC-SCH-019 instead confirms rotation happens at all within a generous polling window, which is what AC4 actually requires.

Recommendations

1. Fix BUG-SCH-001 : add a "No Results" (or equivalent) empty-state message to the scheme card list when a search matches nothing, matching the same pattern already used elsewhere in the app (e.g. the Savings Application Dashboard's "No Records Found" row).
2. No blockers to go-live — core navigation, scheme listing, search filtering, the details panel, and the scheme-selection redirect all work correctly.
